

SUBJECT:	Economics of International Migration		
HOURS:	30	ECTS:	

Name/title of the author:	
Course Description:	International migration is still perceived as a controversial aspect of the global economy, as contrasted with international trade, FDIs etc. There are many myths connected to migrants and their economic influence on both sending and host countries. Most of these myths originate from the relative ignorance of policy-makers and public society in general about migration processes. The course presents the most important economic aspects of international migration, including the economic integration of foreigners in a host country, immigrant entrepreneurship, fiscal effects of immigration and many others.
Learning Outcomes (Goals and Objectives of the course):	Familiarize students with most important economic outcomes of international migration movements from the perspective of sending and host countries. The effects are investigated on micro (local), regional and macro (national) levels.
Entrance qualifications:
